The Area... Located in the central interior of BC, Quesnel Lake is almost 1800 feet deep. With over 360 miles of shoreline, it is one of the largest lakes in North America. Set amongst the pristine Cariboo Mountains, Quesnel Lake is surrounded by countless smaller lakes, rivers and creeks.

Fishing... Quesnel Lake is home to large Rainbow Trout, Dolly Varden, Kokanee and Lake Trout, all of which can be caught on flies, spinners or trolling gear all season long. And, with over 30 small lakes within an hours drive, we are a great location for the still water enthusiast. We also have two major rivers for unparalleled fly-fishing experiences, for both the novice and experienced. The diversity of our area creates a unique fishing experience for all types to enjoy, in a spectacular and uncrowded wilderness setting.

Guided Fishing Packages... Let us take you down a Heritage River by drift boat so you can concentrate on your dry fly presentation to the wild resident 'bows that can average 2-3 pounds and can exceed 10 pounds! Travel by jet boat to a Sockeye stream in the Cariboo Mountains Park, where you can spot and stalk the big 'bows and Dollies that follow the Sockeye out of the lake and into the river to forage on egg patterns. Wet- or dry-fly fish one of our uncrowded small lakes, and fish the big lake seeking a large 10+ pound 'bow. These may be the best fishing experiences anywhere to be found. Ask about our fully-guided packages or, let us customize one especially for you.
